

KISS 6max and Full Ring Cash Game Ranges

Here are directions for using the ranges. For more detailed directions, read *Preflop Online Poker*.

- Don't follow the ranges blindly. If you've got super foldy blinds, you can raise more hands in the CO and BTN. If you're up against aggressive 3bettors with position on you, tighten up all of your ranges so you can defend more frequently.
- You'll open the same CO range in the SB when it's folded around to you.
- You'll raise in the BB with the BTN open-raising range when the SB is the only limper in the pot.
- The ROL stands for "raise over limpers" so that's the range you'll raise over limpers with in the blinds. Make it at least 5bb+1 per limper.
- In each position, your 2bet call and 3bet ranges are based on the position of the open raiser. Keep in mind their player type and the range you think they have there. If you can get away with more 3bet bluffs or wider value 3bets, then do it. If you can profitably call with a wider range because you think the blinds or the players yet to act won't 3bet, then go ahead. If there are aggressive players yet to act, then tighten your calling and 3betting ranges.
- The EP ranges are used for UTG and MP in 6max games, and UTG through the HJ in full ring games. You can tighten up in the earliest positions if you prefer in full ring games.
